Important Information

ATM

If you happen to have a thief or someone forces you to pull your money from the ATM, then enter your PIN from in the back ..

So if your PIN is 1254 you write 4521. The ATM will issue your money, but will automatically alert police which the thief does not know.

This opportunity exists at all ATMs, but many people don't know.

HOW YOUR MOBILE PHONE CAN HELP YOU IN EXCEPTIONAL CIRCUMSTANCES

How in the world can call the ambulance, police ...

Number only for emergency situations since your phone can dial in all the world is 112. If your phone does not ring, then ask your phone number 112 and will require closer network that is available. Then the display will appear to call emergency numbers in the region where you are. Interestingly, the number 112 can be called even when your phone is encrypted or when your keypad is locked.

KEYS TO OPEN AUTOMATIC the car when the keys are closed in the car

This mode of action probably will ever be needed. If your carkey remains inside the car and its doors are closed, then do not worry that there is a solution, if you have a spare keyautomated home. Do this: make a phone call at home and close your door car near 30 cm. The person in your home should automatically keep the key near the phone and press the key to open the car. So your car will be opened.Distance is not important, important is only to call the person at home who has spare keys of your car.
